

Have FUN and show HOW you are Creative!

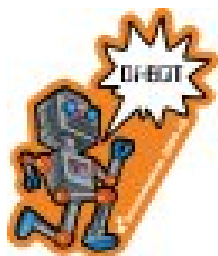

Kealing Hornets have "the right stuff" for these creative problem solving challenges! What interests YOU?

Would you like to work with up to 6 other students and tackle an open-ended challenge then showcase your result at a tournament in March?

FIND OUT MORE about DI Teams forming at Kealing!

When: after school, **Tuesday November 3**

Where: Ms. Crouch's classroom—Room 231

DI-Bot

Design and construct a robotic device called a DI-Bot which begins as a prop or set piece and transforms into a DI-Bot to complete a task in your original story about how a character's life can be changed by robotics.

Direct Deposit

Can you create a device that will deliver objects to targets that you cannot see behind a barrier? Choose between delivering fewer, high-scoring items or more, low-scoring items within the time limit and present an original story about making a cost-benefit decision.

Breaking DI News!

Will you make headlines by making the structure that weighs the least and supports the most weight? Using only newspaper and glue, create your structure and present and original skit about a newsworthy event that took place in a nation other than your own. Stretch your imagination by using recycled newspaper in costumes and props!

Do or DI

A "Threatened Thing" is in danger of extinction! You will create an improvisational skit about a randomly selected character using a randomly selected Unimpressive Superpower (revealed DURING your skit) to save the "Threatened Thing".

You're Gonna Flip!

Scrooge... Dorothy... Now's your chance to present an original story about a character who changes their point of view. Design and make at least one puppet as a character in your story. And, LIVE, during your presentation, create a piece of ART that symbolizes pre-and-post FLIP.

BAND Together-Project Outreach

Reach out with Music to change the world! Decide on a community need and create a project to address it. Form a musical group and create an original musical performance which includes a Multisensory Aesthetic Experience to tell about your project!
